BRUSHES

An artist needs a good brush. ArtCreation Elements has a wide range of quality brushes for different types of paint and techniques. The brushes vary in sizes, hair type and shape. The type of brush depends on the type of paint you use, your painting technique and your personal preference. In addition to brushes in economical standard packaging, ArtCreation has 2 sets of brushes in a practical black canvas organizer. These organizers can be closed with a zip and are ideal for storing or transporting brushes.

BRUSH SHAPE

Brushes are available in various shapes.

- With a **FLAT BRUSH**, the so-called 'Gussow model', you paint larger sections and small, flat brush strokes.

- A **ROUND BRUSH** is suitable for more detailed work.

- A **CAT TONGUE** model combines the characteristics of flat and round pointed brushes; the hair has been fitted in a flat ferrule, but is longer in the middle. Cat tongue models are therefore suitable for both larger sections and smaller details.

- A **FLAT ONE-STROKE LINER** has a long hair bundle for applying flat and wide brush strokes and for painting and wetting large surfaces.

- A **SPALTER** is a very wide flat brush and can be used to paint large areas. Hog bristle spalters are also used to prepare grounds.

HAIR TYPE

For the brushes of ArtCreation Elements both natural and synthetic hair is used:

- **HOG BRISTLE** (bristle) is a sturdy type of hair which is used for thicker paints, such as oil and acrylic colours. The hair is strong and resilient and leaves a brush stroke in the paint
- **OX-EAR HAIR** is a strong and durable soft hair type that is suitable for all types of paint, and particularly if you don't want to see a brush stroke or if you use the paint thinned. As ox-ear hair can absorb a great deal of thin paint, this brush is also suitable for water colour and gouache.
- **FILAMENT** consists of synthetic fibres (polyester) and is suitable for all types of paint. Due to the strength and resiliency of polyester, filament brushes are highly suited for oil and acrylic colours. As the filament brush absorbs moisture well, it is also suited for water colour and gouache.
- **RED SABLE** hair is very popular among water colourists. Red sable hair can absorb a great deal of very thin paint, is highly resilient and when wet has a very sharp point. It is possible to paint fine details as well as large sections with it.
- **PONY HAIR** is an affordable soft type of hair that absorbs water well. Pony hair brushes are therefore ideally suited for water colour and gouache.

BRUSH SIZE

The size of the hair bundle of your brush is very important. For fine work you use a thin brush. For larger colour sections it is better to use a finer brush. The size of the brush is indicated by a number: the higher the number, the thicker the hair bundle.

BAMBOO MAT

Article number 9059001M

A durable way to transport brushes. Insert the brushes into the compartments, roll up the mat and close using the cord. In this way, the hair bundles are protected against damage, and wet brushes can dry out thanks to the ventilation provided by the mat. Brushes not included. Size 360 x 360 mm.

ARTISTS' CANVAS

Also for stretched canvases at ArtCreation Elements you have come to the right place. Here you will find universally prepared canvases that are suitable for both oil and acrylic colours.

The canvas has been stretched on a stable wooden frame to avoid warping and bending. With larger sizes diagonal and cross laths give the frame extra rigidity. The canvas can be re-tensioned with the pegs provided.

The canvases are available in various sizes and come in two versions: standard (2 cm thick) and extra thick (3D, 4 cm thick).

Handy: the canvases are ready for use!
